

Intersection upgrades complete at Liverpool and Hinchinbrook

Transport for NSW | January 2020

Additional right turn lane from Hoxton Park Road onto Whitford Road, Hinchinbrook

Transport for NSW has upgraded two intersections at Liverpool and one intersection at Hinchinbrook to ease congestion, improve traffic flow and reduce travel times.

The NSW Government provided funding for these upgrades as part of its \$300 million Urban Roads Pinch Point Program, which aims to reduce congestion and improve travel times on Sydney's busiest corridors.

The upgrades were completed in November 2019. Before this, road users often experienced heavy congestion and long wait times at these busy intersections in Liverpool and Hinchinbrook. Turning traffic would line up and block other motorists from continuing their journeys, especially during morning and afternoon peak times.

Transport for NSW has now completed this work to help addressing this. Since opening to traffic, the upgrades have been easing congestion and delivering more reliable trips to and from the Liverpool CBD for all road users.

What did we do?

The following intersections have been upgraded:

- Elizabeth Drive and Marsden Road, Liverpool
- Hoxton Park Road and Hume Highway, Liverpool
- Hoxton Park Road and Whitford Road, Hinchinbrook.

Transport would like to thank residents, businesses and the broader community for their patience throughout the three projects.

Upgrade details

Elizabeth Drive and Marsden Road, Liverpool

- Provided an additional dedicated left turn lane on Marsden Road
- Widened west and east side of Marsden Road
- Adjusted stormwater drainage on the northern side of Elizabeth Drive
- Relocated traffic lights and utilities to suit the upgraded intersection.

Hoxton Park Road and Hume Highway, Liverpool

- Added an additional southbound right turn lane from Hume Highway onto Hoxton Park Road
- Widened Hume Highway to accommodate the additional southbound right turn lane
- Relocated the median, pedestrian crossing and stop line on Hoxton Park Road to enable two lanes turning right from the Hume Highway
- Relocated traffic lights and utilities to suit the new upgraded intersection.

Hoxton Park Road and Whitford Road, Hinchinbrook

- Added an additional westbound right turn lane from Hoxton Park Road into Whitford Road
- Created dual northbound lanes on Whitford Road.

Community benefits

The upgrades are helping to:

- improve traffic flow through Liverpool and surrounding suburbs
- reduce travel times and ease congestion for local residents and commuters
- increase access to and from the Liverpool CBD
- improve safety for all road users.

Nearby work in Liverpool

The upgrade of the Hoxton Park Road and Joadja Road intersection in Liverpool is also underway.

This means our site shed at Hoxton Park Road Hinchinbrook, west of Banks Road intersection will remain in place. Residents will receive further updates about this project as the project progresses.
