New traffic, pedestrian signals complete on Kingsway, Woolooware

End-of-work │November 2019

New traffic and pedestrian crossing signals on Kingsway and Woolooware Road, Woolooware

The NSW Government delivered this project as part of its commitment to improve traffic movements and road user safety.

Roads and Maritime Services has finished installing new traffic and pedestrian crossings signals on all approaches to the intersection of Kingsway and Woolooware Road, Woolooware.

The project aimed to improve safety for road users and pedestrians at the busy intersection. New traffic signals with right-turn arrows will allow for safer turns from Kingsway, southbound onto Woolooware Road. A new, dedicated left-turn lane for northbound traffic on Woolooware Road will also help ease congestion at the intersection.

Pedestrian safety and accessibility have also been improved with signalised pedestrian crossings now operational on all approaches to the intersection, reducing the risk of collisions.

Work started in September 2019. Changes to parking involved the extension of the 'NO STOPPING' zones on both Kingsway and Woolooware Road.

The team worked five nights a week to minimise impact to residents, with the noisier work completed by midnight.

We are grateful to the local community for their patience while we completed the project.
