

Completed intersection upgrade at Narellan Road and Appin Road, Campbelltown

Roads and Maritime Services has completed this project to help ease congestion and improve travel times for motorists in the area.

The newly upgraded Narellan Road and Appin Road intersection in Campbelltown

Residents and motorists of Campbelltown, Bradbury and Ambarvale were experiencing congestion and long wait times travelling through the Narellan Road, Appin Road, Oxley Street and The Parkway intersection.

Roads and Maritime has now completed upgrading this 'pinch point' intersection. Since opening to traffic recently, this upgrade has eased congestion and is delivering more reliable trips for all road users and pedestrians.

What did we do?

Our work included:

- widening the southern side of Narellan Road and south western corner of Narellan Road and Appin Road to allow space for new lanes
- converting the existing shared right and through lane on Narellan Road to a dedicated through lane for motorists accessing The Parkway and Oxley Street
- building a second dedicated right turning lane on Narellan Road for motorists accessing Appin Road
- adding a fourth pedestrian crossing at Appin Road to improve pedestrian safety and access
- repainting bike lanes to improve safety and visibility for cyclists and other road users
- replanting trees and other flora using fast growing natives.

Community benefits

The project is:

- easing congestion with increased number of turning lanes at the intersections to improve traffic flow through this central Campbelltown intersection
- reducing travel times during journeys with better traffic flow from Narellan Road to local shops and homes off The Parkway, Oxley Street, and Appin Road
- improving safety and reduce travel times for pedestrians with the additional pedestrian crossing
- creating more reliable trips for locals travelling across Campbelltown to connect to the Hume Motorway, shops along Oxley Street and homes off The Parkway.

More work on Appin Road

Roads and Maritime plans to improve safety and increase road capacity further south on Appin Road with two proposed projects:

- Appin Road upgrade between St Johns Road, Rosemeadow and Mt Gilead
- Appin Road safety improvements between Mt Gilead and Appin.

What is a 'pinch point'?

A pinch point is a traffic congestion point, either at an intersection or on a short length of road, where a traffic bottleneck exists. This causes traffic build-up and travel delays at these spots and on the wider road network.

More than \$825 million has been committed to the pinch point program. Each project eases congestion, reduces traffic delays and improves travel times on Sydney's major roads.
