

# Transport Access Program Clarendon Station Upgrade

## Community Notification

July 2023

Transport for NSW acknowledges the Dharug people of the Dharug Nation as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

The NSW Government is improving access at Clarendon Station.

### What work are we doing?

Major work to improve accessibility and increase commuter car parking at Clarendon Station was completed late last year as part of the Transport Access Program. In the coming months, further work will occur at the station to make improvements to the station level crossing.

Work in July will involve:

- concreting and installing light pole footings
- installing rubber panelling to improve safety at the level crossing
- asphaltting work
- installing a new signal box, involving steelwork, piling, and concreting

### When we will be working

Weekend work will be carried out between **6pm Friday 21 July** and **7am Monday 24 July 2023**.

For the safety of staff and customers, this work will take place during a scheduled Sydney Trains trackwork period when no trains are running, and the station is closed.

Wherever possible, we will take measures to reduce noise, including turning off vehicles and equipment when not in use, exercising respite periods during work and using non-tonal reversing beepers.

Equipment being used includes excavators and delivery trucks, concrete trucks and pump, dump trucks and hand tools.

### Traffic changes

To enable safe construction, we will require a temporary full road closure of the Clarendon Station level crossing between Hawkesbury Way and Racecourse Road between **4am Saturday 22 July and 4am Monday 24 July**. Traffic control and detours will be in place. Pedestrian access across the station will be maintained. Access to Racecourse Road will remain open via Blacktown Road. Please see map overleaf.

### How will the work affect you?

You may notice:

- road closures and reduced speed limits
- pedestrian and cyclist detours with traffic controllers on site to guide you
- temporary use of commuter car parking
- workers and vehicles
- noise from machinery and equipment

### Managing our impacts

We aim to manage our work to avoid impacts to the community and the environment.

This includes:

- fencing for safety and security
- reducing our noise as much as possible
- targeted lighting to minimise light spill

## Location of road closure and detour routes from 4am 22 July to 4am 24 July 2023
